Message

I am glad to know that the Fluid Control Research Institute (FCRI), Palakkad is organizing a Global Conference and Exhibition – “flotek.g” - “Towards Smarter and Greener Flow Measurement and Control”, Oil, Gas, Water... during 18th to 20th January 2012, at FCRI.

I understand that this is the IVth Global Conference and Exhibition organized by the FCRI in Flow Measurement and Control aspects and the earlier conferences were very successful and beneficial to the scientists and Engineers working in Flow Industry. I am confident that this Conference will provide a common platform and opportunities to the professionals in this field to generate new idea and share their experience in flow metering technology. I hope that the Scientists, Engineers and Technocrats engaged particularly in flow measurement in the Oil, and Gas related industries will greatly benefit from this Conference.

I wish all success for the conference.

Message

I am happy to announce that Fluid Control Research Institute is organising the IVth Global Conference & Exhibition – flotek.g 2012 with 'Towards Smarter & Greener Flow Measurement and Control System' as the main theme during 18th – 20th January 2012, at its premises at Palakkad, Kerala. This conference is an endeavour of FCRI for sharing knowledge, information and trends in technological advancement with the global flow product research, manufacturing and metering fraternity, especially in the continuous process, energy and hydrocarbon industries.

I am confident that this Conference will provide a valuable platform and opportunity to the professionals in this area to generate new ideas and share their experience. I hope that the Scientists, Engineers and Technocrats engaged especially in the Oil & Gas related Industries will be greatly benefitted from this event.

I wish the conference all success

Director's Invitation

Commodore (Retd.) S. Saseendran
Director

Fluid Control Research Institute
Kanjikode West, Palakkad, Kerala

It is our great pleasure to announce the IVth Global Conference & Exhibition - flotek.g 2012 "Towards Smarter and Greener Flow Measurement and Control" as the main theme at FCRI, Palakkad during 18th-20th January, 2012. It will be a common platform and also an opportunity for the exposure of Indian/International Flow Control and Measurement industry to the Global flow fraternity.

This Global Conference is organized with aim of keeping abreast the technological advancements/new trends in the flow industry and flow measurement priorities in the oil/gas/process industry sectors. The response for the previous Conferences was overwhelming and the participation from the flow industry was very encouraging. I am sure the flotek.g 2012 will also have splendid response in terms of technical papers and key note addresses by renowned experts in the relevant field from India and abroad in flow domain.

The Technical Expo, organized along with this global event will focus on new trends and developments in technologies in the flow industry; and this will be a great opportunity to showcase their products and achievements.

This conference will serve as a common platform to Consultants, Sr. Managers, Engineers, Executive, Marketing Specialists, Quality Managers and Auditors from Upstream/Downstream of Oil/Gas sector/Petrochemical and various other Industrial sectors. I am confident that the Scientists, IT Experts, SCADA Implementers, Simulation and Software Engg. Experts & Academicians will immensely benefit by exchange of research & technical experience in the latest technological advances in the flow related fields.

With the experts from industry/research and academia sharing their thoughts and experience, I am sure, the participants will benefit the most from this event. The website www.flotekg.com captures the essence of the previous conference held in 2007 and will act as a portal for all participants of the conference to be held in Jan 2012.

We look forward to your valuable support and active participation.

Hope to see you at the conference,

Comde (Retd.) S. Saseendran

PAPER SUBMISSION

Call for papers:

In addition to participation, we encourage you to submit papers on flow technology related topics cited above. Technical presentations must emphasize the practical advantages of current and future flow measurement technology. In addition to the invited guest lectures, contributing papers from the Engineering, Technical personnel working in the Industry, R&D Centers, Academic Institutes, etc are also invited on the above topics. Each paper should have at least one delegate towards the presentation of paper. The presentation time will be for 15 minutes and subsequent discussions will be for 5 minutes. Selected papers of the Conference will be considered for Publication in Technical Journals.

Topics & Sub Themes:

Flow metering techniques for process measurement and control. Measurement of Non Newtonian Fluids. Flow meter performance characteristics. Measurements for Custody Transfer of oil, gas, water and exotic petro products. Challenges in NG, CNG, LPG, LNG measurements. Model Approval as per API/AGA/OIML/BSEN/NGV. Oil Storage and Tank Farm Management. Primary standards for process parameters. Auxiliary measurements for flow measuring and control. Advances in Level, Pressure, Temperature instrumentation and performance. Optics metrology and condition monitoring. Meter calibration facilities, measurement traceability and uncertainty analysis. International comparisons and domestic traceability. Installation effects of meters and their mitigation. Direct energy metering, fuel quality and physical properties of fluids. Analytical Instrumentation, Chromatography and Spectroscopy. Development in flow meter technologies for major, mini and micro flow rate measurement. Computer modeling applications in flow meter design and evaluation. Appropriate Application and selection of flow metering technologies, Field Experiences and case studies of Metering Technologies. Flow Measurement techniques for open Channel. Water-Metering, Transmission / Distribution. Wet gas and multiphase flow measurements, Tomography. Nano Fluid Technologies for flow industries. Scada, IT,

Intelligent and smart measurements of process. Intelligent/Automatic Flow metering control and management. Software for Flow Measurement and Control. Valves for process and petroleum industries. Pressure Regulators and Other Control Elements for process. Pressure Vents and Safety Devices for Fluid Handling Systems. Seals and sealing mechanisms in pumps, valves and flow meters. Fugitive emissions from pipelines, valves and pumps - control and evaluation. Design of valves for severe service applications. Valves for nuclear and super power plants. Pumps, Compressors, fans and blowers for process flow control. Cavitation and noise in valves and pumps. Management and HRD aspects of Calibration / Research facilities. Acoustic effects on flow meters. Flow meter in-line diagnostics and servicing. Review of measurement standards and updating. Standards, Recommendations and Practices of Calibration and Proving Methodologies. Measurements for Eco friendly process. Hazardous Area, Health, Safety and Environment Management process control and measurement.

Poster Session

Technical papers not considered for oral presentation will be included in poster session

Acceptance of Abstract and Intimation

The abstract should be 1 page of A4 size typed in single space (Times New Roman - 11 Font) and should accurately summarise the content of the full paper. Please include on the abstract page, your full name, company, phone, fax and E-mail details. All papers will be in English. Last Date for submission:30-11-2011 and Last Date for intimation :1-12-2011

Schedule for paper submission :

Submission of Final Camera Print (Soft & Hard Copy) - 15.12.2011

The language of the seminar will be English. Conference Souvenir will be published. Delegates will be provided with soft copy of the proceedings.

Opportunities for Corporate Video Presentation

Manufacturing / Service oriented Companies can make use of this opportunity to showcase their company through Video Presentation. The Video / Presentations will be played during the Lunch / Tea Breaks. Fee : ₹ 5,000 / US\$ 115 per minute. Maximum duration allowed 10 minutes.

Exhibition: The flotek.g Exhibition will focus on development in technologies for flow measurement and control systems, analytical instruments, refining and pipeline services, oil & gas field hardware/software, R&D, training and publication of technical literature. Manufacturers & Service Providers are welcome to display their products and service system as it will provide an excellent platform for users and suppliers to come face to face.

Venue: The exhibition will be held at FCRI, Palakkad. Prefabricated stalls conforming to international design, in size of 9 sq.m built up area and in multiples will be provided.

Rates: For Indian Exhibitor - ₹ 7500 per sqm (Min. 9 sqm) For foreign Exhibitor US\$ 165 per sqm (Min 9 sqm) with 20% discount till 31-12-2011. Deadline : 31-12-2011

We shall provide 1 table, 2 chairs, 2 Power Connection Point, 2 Spot Lights and floor carpet.

Payments: All remittances including hotel advance should be made through local or at par Cheque or Bank Draft (for Indian delegates) and Foreign Telegraphic Transfer or Bank Draft (for foreign delegates) in favour of Fluid Control Research Institute payable at Palakkad, Kerala, India and to be sent along with the registration form. **Payment by NEFT/RTGS :** Fluid Control Research Institute Account No.10258760349 with State Bank of India, (SSI Branch), V&V Apartments, Opp. ITI, Kanjikode West, Palakkad – 678623.
