Director's Reflection

Dear Participant,

It was our privilege to have you at FCRI during the flotek.g held during 18-20th January 2012. We are very thankful to you for accepting our invitation, lending much needed support, and gracing us with your presence here.

FCRI Global Conference continues to provide a relevant and dynamic forum for the exchange of information for the experienced Industry personnel as well as for the newcomers to the world of flow measurement and control techniques.

This conference included excellent technical presentations with useful ideas that the delegates can take back to their jobs. Paper presentation and discussions of participants were strongly encouraged to share information on their own Industry's experiences and lessons learned. In fact, feedback from delegates showed that this type of presentation is exactly what draws them back to FCRI Conferences every 4 years.

More than 50 companies exhibited their products in this year's Exhibition. During the breaks in the busy conference programmes, delegates visited the exhibition stalls to network with representatives from flow product manufacturers.

We sincerely believe that the conference was a useful forum for you to exchange your thoughts among experts on the recent developments in flow measurement and control. Delegates from Industries and Academic Institutions were more than happy that their time and budgets were being well spent.

I am sending herewith a pictorial retrospect of the conference events which will give you at least a flavor of the event.

We once again thank you for your support and look forward to continued patronage from you and see you again

With thanks and regards,

Commodore (Retd.) **S. Saseendran**
Director, FCRI

“The present conference theme is apt to highlight the various measurement techniques in flow related industries practiced in the world, especially for Smarter & Greener Applications.

I hope this conference will provide a common platform for R&D, Industry to discuss relevant technical details & consolidate the requirement for future development”

Shri. S. Sundareshan, IAS

Secretary, DHI

Ministry of Heavy Industries & Public Enterprise, Govt of India.

“The Institute which is a unique facility in South Asia renders commendable service to the process industry and various allied industries in the field of flow measurement and Control. In addition, the institute has been in the forefront for imparting training and providing its infrastructure and expertise for R&D in the sophisticated measurement technology. The conference is one of the endeavors towards this objective. The conference has brought together experts from Industries, R&D Institutions, Academic Institutions, Public & Pvt Industries and will provide them the opportunity to share their thoughts & Expertise”.

Shri. Shashank Goel, IAS

Chairman GC, FCRI

Jt. Secretary, Ministry of Heavy Industries & Public Enterprise, Govt of India

“I am very pleased to be here and I bring best wishes for a productive & successful conference all the way from the other side of Atlantic.

I commend in high manner your efforts for the conference arrangements here and look forward with high enthusiasm for Smarter & Greener Flow Conference”.

Dr. George Mattingly

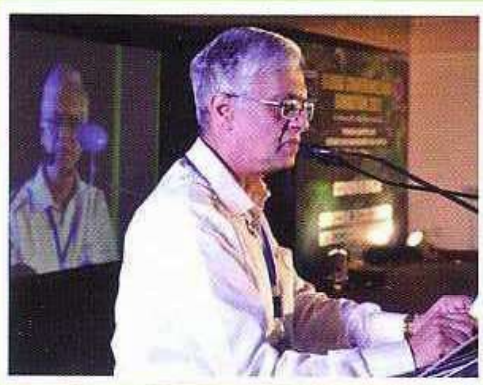

Key Note Speaker

The Catholic University of America (CUA), (Retd.), NIST, USA

“With India's ambitious infrastructural development, the demand for flow excellence both Green & Smart is particularly strong. The future prospects for flow measurement especially in India look extremely bright”

Dr. Manus Henry
Key Note Speaker
Oxford University, UK

“FCRI plays a vital role in evaluation of flow products in Oil, Gas & Water measurement. I am sure that this conference will provide each one of you and the oil and gas related industry an opportunity to discuss new concepts and to share successful ideas for implementation by stake holders for the benefit of all”

Shri. S. Krishnan - IAS
Chairperson, PNGRB

“I am impressed with the FCRI performance in the field of Research & Development and Training for domestic & Overseas Engineering professionals for the last two decades”

Felicitation by

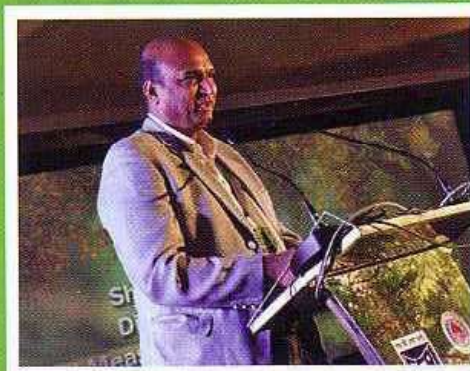

"I am all the more delighted to see the prominence of FCRI growing in every area which is most vital to the development of our nation. The enthusiasm which I can see from the delegates is heartening and I am sure that you might have enjoyed the hospitality of FCRI & Palakkad".

Shri. M. B. Rajesh
Member of Parliament, Palakkad

I am very pleased and happy to be here in the prestigious location at Palakkad and to be associated with a prestigious institute in a very niche area of Technology that is flow measurement."

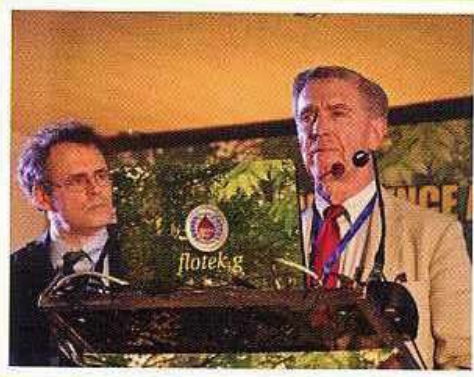

Shri. K. Jamestin
Director HR, ONGC

"Life is a Journey and every day we got an opportunity to learn more. In this 2012 edition of flotek.g-2012 we got plenty of opportunity to learn and all of us would have benefitted the most of it."

Shri. Trilochan Gupta
Director-Emerson Process Mgt AP Pvt Ltd

Summing up the conference

We are impressed on the International nature of the conference. There were more than 400 delegates and 50 Exhibition stalls in the flotek.g-2012 Global Conference and Exhibition.

Another milestone achieved in this conference was the launch of the open source E-journal "Flow Engg & Technology". This is another milestone in the international recognition of FCRI.

The entertainment that we had in this conference for the two days with ancient and modern culture was an absolute delight. We had a feast of taste, Sights & Sounds that has been magnificent.

We have highly appreciated the welcome by FCRI and impressed in the massive investment in facilities here compared to what we see in Europe. This is a sign of confidence and ambition to future growth.
